

# **A Working Class Program For a System Stuck in Crisis**

**We have been living through the spread of a deadly virus – made more deadly by the capitalist system.**

- Hundreds of thousands of people will die because the public health system was not prepared to deal with the virus – or any deadly disease.
- For decades, every government, Democrat or Republican, raided funds from public health just like they stole funds from roads, dams, water and sewage systems, and education.
- Every government gave that stolen money away in tax breaks, subsidies and outright gifts to a greedy capitalist class. Public money went to their private profit.

**We are living through an economy in collapse – made worse because government policies let the virus get out of control.**

- Even when their economy was “expanding,” the capitalist class was slashing jobs, cutting wages, making jobs temporary, part-time or contracted out.
- The money made in production went into bigger profits, more wealth for the top 1%, and more speculation on Wall Street.
- The uncontrolled virus just exacerbated all the problems of an economy already in crisis.

## **There IS an answer to this crisis – an obvious answer**

**Take the money government gives away to corporations, banks and the very wealthy 1%.**

- Use it to fund all the public services, including public health and education.
- This would create a better, more sanitary, healthier and more fulfilling society to live in.
- It would create jobs – including all those necessary to make every workplace safe.

**Take back the wealth the capitalist class steals from our labor every day.**

- Use this wealth to guarantee everyone a job – with decent wages that keep up with prices.
- If the bosses can't hire everyone full-time, then slow down the pace of work, reduce the hours of work for everyone – with no loss of weekly pay for anyone.

## **The working class can fight to make this happen**

**Working people are essential. We make everything run. We know how everything works. Organized together, the working class can change the world.**

- No one else will do it for us. No one will hand us jobs and wages and a healthy country. Not the Democrats, not the Republicans, not Trump, not Biden. No one else.
- But WE have power – when we stand together as one class, ready to fight.

## **We need all our forces to fight**

**The racism spewed by our enemies works to divide us, to weaken us as a class – whether it is spewed from Wall Street or corporate offices or the State House or the White House.**

- Our whole class has come under attack.
- But the black population has suffered particularly, through the indignities and violence of racism locked into the way the system was organized from its beginning.
- Recognizing this reality doesn't take anything away from anyone else.
- Facing reality, we will bring ourselves together as one class, ready to fight for jobs and a decent life for everyone.

**We won't change our situation with an election. But we can use this election to say there are people, tens of thousands of people, who agree with this program for the crisis.**

## **Vote November 3 for Working Class Party candidates**
