

Workers Should Not Pay For the Bosses' Crisis!

The capitalists protected themselves from the crisis they created by cutting jobs, cutting wages and increasing our pace of work.

- **A bigger share of the national income went to corporate profits than at any time in the last 60 years – this is the bosses' recovery!**
- **Those profits were used to increase dividends and stock buy-backs, making the wealthy wealthier still. Today, the richest 10% of the population owns 85% of the financial wealth of this country. The richest 1% owns 42%.**
- **And the banks took their share of the profits right off the top, even while the government and the Federal Reserve handed them trillions of dollars.**

The recovery enjoyed by the bosses was built on continuing high unemployment and wages that fall further behind prices.

There will be no recovery for us until that stolen wealth is taken back, used to provide a job and an adequate wage for everyone.

- **No company making a profit should be allowed to lay off a single worker!**
- **No company should be allowed to pay wages that leave a family in poverty!**
- **The capitalist class must be made to provide work for everyone who is ready to work!**
- **Everyone could work fewer hours – with no loss of pay for anyone! The wealth is there to pay for it!**

For a working class policy, a working class fight!
