Take Back that Stolen Wealth! Use It! Everyone Could Have a Job, Everyone Could Have Decent Wages

The Federal Reserve says the economy has been in a recovery since June 2009.

And it has been – for some people!

- Corporate profits are up.
- Dividends paid to major stockholders are up.
- Executive salaries are up.
- Stockmarket prices are up.
- Corporate mergers and buyouts are up.
- Speculation is up.
- And the banks are awash in money.

It's a bonanza for the capitalist class and their bankers.

But for working people, 3½ years of recovery means only high unemployment and wages that don't keep up with prices.

This is no recovery – it's a full-blown crisis!

• It was built on wealth the capitalists stole from the workers' labor.

There will be no recovery until that stolen wealth is used to provide a job for everyone, an adequate wage for everyone.

When We Fight, We Don't Always Win, But When We Don't Fight, We Lose – Always!
